SUMMARY

AI Engineer with 2+ years at LG CNS America, shipping enterprise GenAI across cloud and on-premises stacks — led a **multi-agent contact center platform handling 11K+ monthly calls** and an end-to-end **return analytics pipeline over 230K+ records**, achieving **~2% reduction (~\$1.6M)** in product return rate.

SKILLS

Languages	Python, SQL, Java
AI / ML	RAG, Multi-agent Systems, Model Evaluation, On-premises LLM Serving, Prompt Engineering
Platforms	Vertex AI, BigQuery, Cloud Composer, AWS, Apple Silicon, Ollama, MLX

EXPERIENCE

AI Engineer LG CNS America, Inc.	Jun 2024 – Present <i>New Jersey, United States</i>
--	--

Return Reason Analysis AX Project

- Owned end-to-end design and delivery of an LLM-powered pipeline summarizing and classifying **230K+ annual return records across LG Electronics' retail (The Home Depot) and direct-to-consumer (LG.com) channels in the U.S.**, replacing manual review with automated GenAI workflows that contributed to **~2% reduction in overall return rate (~\$1.6M estimated annual savings, 2025 vs. 2024)**.
- Engineered an end-to-end pipeline orchestrated by Cloud Composer (managed Airflow on GKE), integrating heterogeneous sources (OLAP, enterprise data lake, retail partner crawler) via SQL into automated Vertex AI batch inference with LLM summarization and embedding-driven classification.
- Led on-premises migration from Gemini 2.5 Flash to a locally-hosted SLM on Apple Silicon (Mac Studio), benchmarking **Gemma 4 vs Qwen 3.5** across **Ollama and MLX** serving frameworks; selected **Gemma 4** with **91% accuracy parity to the cloud baseline**, reducing cloud spend and strengthening data residency.

Contact Center AX Project

- Led architecture and delivery of an enterprise contact center AI platform deployed across **23 agents handling 800+ daily customer interactions (~11K monthly calls)**, integrating real-time call transcription (AWS Connect STT) with Salesforce Agentforce; **deployed in 2 months — 150% faster than industry baseline**.
- Designed an **Adaptive RAG (ReAct-based modular) multi-agent architecture** for call/email assistants, automating summarization, sentiment analysis, and reply recommendations across **Web, iMessage, and WhatsApp**.
- Architected a knowledge ingestion pipeline (Bynder DAM → GCS → Salesforce Data Cloud) processing **2,082 documents (12.4GB)** with chunking/embedding/vectorizing, secured by **Salesforce Trust Layer**.

Software Engineer Intern Samsung SDS	Jun 2023 – Aug 2023 <i>Seoul, South Korea</i>
--	--

- Developed Salesforce CRM automations with Flow Builder and prototyped an AI-assisted CRM feature using Apex and Lightning Web Components (LWC), streamlining workflows for Sales Cloud administrators.

EDUCATION & CERTIFICATIONS

University of Wisconsin–Madison Bachelor of Science in Computer Science	May 2024 GPA: 3.55 / 4.00
