SUMMARY

AI Engineer with 2+ years shipping enterprise GenAI end-to-end, cloud to on-premises — **~\$1.6M annual savings** from a **230K-record** analytics pipeline and a contact center AI platform serving **11K+ monthly calls**.

SKILLS

Languages: Python, SQL, Java

AI / ML: RAG, Multi-agent Systems, Model Evaluation, On-premises LLM Serving

Cloud: GCP (Vertex AI, BigQuery, Cloud Composer), AWS (Bedrock, Connect)

Infrastructure: vLLM, OpenSearch, NVIDIA GB10 GPU cluster (RoCE, NCCL)

EXPERIENCE

AI Engineer

LG CNS America, Inc.

Jun 2024 – Present

New Jersey, United States

HLBMA On-Premises AI Platform

- Stood up a **2-node NVIDIA GB10 GPU cluster** for a fully **on-premises GenAI platform** at HLBMA (Hyundai-LG EV battery plant) — root-caused a firmware defect restoring **200G RoCE** to **196 Gb/s**; served **DeepSeek-V4** and **Qwen3.5-122B** via vLLM cross-node tensor parallelism.
- Built a citation-grounded **RAG engine** (Docling chunking, Contextual Retrieval, bge-m3 hybrid embeddings, OpenSearch, cross-encoder reranking) hitting **99%** on table-consistency evals; presented a **commercialization proposal** to productize the PoC.

Return Reason Analysis AX Project

- Owned end-to-end delivery of an LLM pipeline classifying **230K+ annual return records** across LG Electronics' U.S. retail and D2C channels, driving a **~2% return-rate reduction** (**~\$1.6M annual savings**).
- Engineered the pipeline on **Cloud Composer** (Airflow), unifying OLAP, data-lake, and crawler sources into **Vertex AI (Gemini 3.5 Pro)** batch inference and embedding-driven classification.

Contact Center AX Project

- Led architecture of a contact center AI platform for **23 agents / ~11K monthly calls**, integrating real-time AWS Connect transcription with **Salesforce Agentforce**; **deployed in 2 months, 150% faster than industry baseline**.
- Designed an **Adaptive RAG multi-agent architecture** for call/email summarization, sentiment analysis, and reply recommendation; built an ingestion pipeline processing **2,082 documents (12.4GB)**.

Software Engineer Intern

Samsung SDS

Jun 2023 – Aug 2023

Seoul, South Korea

- Built Salesforce CRM automations (Flow Builder) and prototyped an AI-assisted CRM feature with Apex and Lightning Web Components.

EDUCATION

Georgia Institute of Technology — M.S. in Computer Science

Starting Fall 2026

University of Wisconsin–Madison — B.S. in Computer Science, GPA: 3.55 / 4.00

May 2024

CERTIFICATIONS

Certified Palantir Foundry Aware Professional — Palantir Technologies

Jun 2026

AWS Certified AI Practitioner — Amazon Web Services

Feb 2026
